

# All Mobile Video

## Project

53rd Street Studio  
Audio Control Room Upgrade

## Application

High Density Audio Solutions

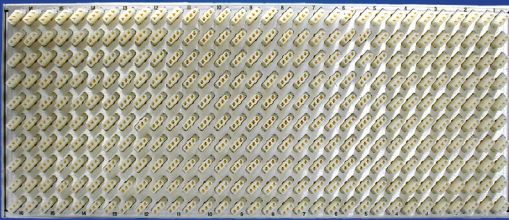

## Technology at work

**PatchAmp** PA1600AHD AES & Analog  
Audio Distribution Systems

**Bittree** Programmable Audio  
Patchbays

**Studer** Vista-8 Audio Mixer

PA1600AHD with Elco E3 backpanel

All Mobile Video recently chose [PatchAmp's](#) High-Density Audio products for its 53rd Street Studio Control Room upgrade. The entire patching and distribution system was pre-wired at PatchAmp's Hackensack facility in order to minimize both the studio's downtime and the on-site labor cost. At the heart of the system are two PatchAmp [PA1600AHD](#) frames providing AES and Analog Audio distribution. One frame contains 16-AES PA-302 quad 1x4 DA's and the second frame contains 16-Analog PA-502 quad 1x4 DA's. The E3 rear connectors on the PA1600AHD frames combined with the E3 connections on the rear of the Bittree patchbays provide for easy installation, troubleshooting and re-configuration of the system if needed.

[All Mobile Video](#) is the country's premier provider of end-to-end video and audio solutions for entertainment, sports, and news programming and events. The company offers the full spectrum of services; from Manhattan-based sound stages with full post-production capabilities to mobile production and editing trucks and extensive uplink solutions that travel worldwide, as well as an extensive equipment inventory that allows them to fully custom spec any facility or location.
