

PatchAmp Lite: How it works

PA3200Lite with 32 cards

PA901 DA with patches

- Frees up valuable RU's by eliminating rack space required for DA's
- Eliminates cabling from DA trays to Patchpanels
- 3Gb HD, HD, SD, Analog Video, AES and Analog Audio Formats
- Less than half the weight of traditional DA's wired to Patchpanels
- Very low power consumption (75 Watts per loaded frame)
- Electrically superior to traditional cabled systems
- Reduces jitter
- All external signals are equalized and reclocked at all patch points
- Increases system reliability and eliminates cabling errors
